comfort customization

Harmony III™
Zoning System

Create four
different
temperature
zones

Enjoy a customized approach to home comfort.

Every room in your home is distinct in some way, whether it has to do with its location or function. Because of these differences, some areas require more lighting than others, and some parts of the house need more heating and cooling.

When it comes to your home's comfort, the Harmony III™ zoning system allows a high degree of customization. Instead of setting one temperature for your entire house, you can create separate temperature-controlled zones. With Harmony III, you enjoy ultimate comfort and control.

Greater flexibility for the many ways you use your home.

The Harmony III system divides your home into four different temperature zones. Working with your HVAC system, Harmony III will increase, reduce or shut off heating and cooling in each area to maintain the desired temperatures throughout the home.

Designed for balanced airflow and quiet operation.

By directing airflow only to desired areas, the Harmony III system allows your Lennox® heating and cooling equipment to deliver peak performance without continually operating at peak capacity. Lower speeds mean lower sound levels, so you can enjoy increased comfort in peace and quiet.

High performance means you'll never sacrifice a degree of comfort.

Working with advanced heating and cooling systems from Lennox, Harmony III can regulate temperature to as little as one degree* of the thermostat setting. Plus, an auto changeover feature automatically alternates between heating and cooling during transitional weather to deliver enhanced comfort in any season.

*Depending on the brand of digital thermostat.

a higher degree of customization

Feel comfortable in every corner of your home.

The Harmony III system allows you to create four different temperature zones within your home, giving you greater control over heating and cooling. It works with your HVAC system to maintain the temperature of each zone, without affecting other areas.

Zone 1: Seldom-used upstairs bedroom (needs little heating or cooling)

Zone 2: Children's upstairs bedroom (high heat in the summer requires additional air conditioning)

Zone 3: Home office or spare bedroom (constant heating or cooling may not be needed)

Zone 4: Family room (high-activity area needs extra heating or air)

Harmony III™ zoning system

Designed for use with Lennox® variable speed furnaces or air handlers and two-stage air conditioners or heat pumps* and digital thermostat, the Harmony III system provides the desired temperature in each zone.

The system includes an easy-to-use control panel, comfort-enhancing dampers and a duct-mounted sensor that relays data to the control panel.

Peace-of-mind protection

The Harmony III™ zoning system comes with a 2-year limited warranty** on covered components.

Feature	How It Works	How It Helps
Solid-State Control Panel	Controls up to four zones in your home	Provides desired temperatures and consistent airflow
Discharge Air-Sensor Probe	Continually monitors the temperature in the supply airstream	Helps prolong the life of the equipment
Digital Thermostats	Control temperatures in each zone	Precisely regulate heating and cooling temperatures (one for each zone)
Vacation Mode	Defaults to Zone 1 thermostat settings, which control the temperature for your entire home while you're away	Maximizes efficiency
Auto Changeover	Automatically alternates between heating and cooling during transitional weather	Delivers enhanced comfort and peace of mind
Continuous Fan	Allows continuous fan operation by zone	Creates better indoor air quality

*System provides stand-alone dual-fuel capability.

**Applies to residential applications only. See actual warranty certificate for details.
